

Maximum Versatility with Minimal Access

Mini-Thoracoscopy Set

Working Channel Endoscope with 5.5 mm
Outer Diameter for Single-Port Access

Minimally Invasive Medical Thoracoscopy— Designed with Patients in Mind

Mini-Thoracoscopy Set

Richard Wolf's unique all-in-one Mini-Thoracoscopy Set enables minimally invasive diagnostics and treatment with one small incision. Its user-friendly, ergonomic design enables better comfort and control for physicians.

Benefits of the Mini-Thoracoscopy Set

- Ergonomic shape for less user fatigue
- Small 5.5 mm outer diameter
- 3.5 mm working channel accommodates various semi-flexible instruments and can be used for suction and irrigation
- Quickly change instruments while maintaining orientation through the working scope channel
- Compatible with Richard Wolf talc blower system
