Laser Enucleation System

Innovations in Endourology from Richard Wolf

Piranha™

Safe, Fast, and Effective Morcellation

A Powerful Solution in BPH Therapy

Piranha™ Laser Enucleation System

Innovative Design

- Modular system is compatible with existing Richard Wolf equipment
- Powerful turbine suction rapidly draws in tissue for morcellation
- Dynamic suction provides a clear field of view, enabling surgeons to maintain orientation throughout the case
- Atraumatic distal morcellator tip designed for patient safety

Versatility

- Equipment works with any brand of laser
- Accommodates laser fibers up to 1000 µm
- Inner sheath allows surgeons to change instruments without removing the outer sheath during a case
- Morcellation and suction functions are conveniently located on one pedal
- Safe, fast, and effective for treatment of any size prostate

Efficiency

- Oscillating blade facilitates complete morcellation that does not leave chips behind
- Ideal for large prostates with dense, fibrous tissue
- No loss of suction during morcellation
- Collects large tissue samples that are suitable for pathology
