

Richard Wolf Ureteroscopes

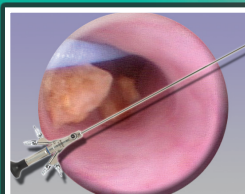

The Needle™ Semi-rigid Ureteroscope

- Small 4.5 Fr. self-dilating distal tip—easy entry with less trauma to the patient
- Large 3 Fr. working channel allows for a variety of accessory instruments
- Sharp, rod lens-like image for superior visualization

The Ultrathin™ Semi-rigid Ureteroscope

- 6 Fr. atraumatic distal tip combines small size without sacrificing utility
- 4 Fr. working channel
- Accommodates larger biopsy and grasping accessory instruments
- Provides superior irrigation for a clearer image

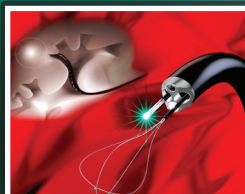

The D.O.C.™ Semi-rigid Ureteroscope

- 6.5 Fr. atraumatic distal tip combines small size without sacrificing utility
- Dual, independent operating channels—use two instruments simultaneously
- Continuous cyclonic flow clears blood and debris for a crystal clear image

The Viper™ Flexible Ureteroscope

- 270° up/down distal deflection permits better access to hard-to-reach areas within the upper urinary tract
- Ergonomic design and light weight offers better control and easier navigation
- Self-dilating atraumatic distal tip enables easy entry with less trauma to the patient

The Cobra™ Flexible Ureteroscope

- 270° up/down distal deflection allows for unparalleled navigation and access
- Dual 3.3 Fr. operating channels provide unmatched flow and visibility, while enabling a wide variety of therapeutic options
- Adjustable laser dial for added safety, accuracy, and ease
